

What I found amazing was that just by sending Dr. Neeta the name of the company

Workshop : Discover Ongoing Thoughts

Published by Anonymous on 2008/9/29

What I found amazing was that just by sending Dr. Neeta the name of the company / business venture I was provided with an in-depth insight into the strengths, weaknesses, problem areas and road blocks, which are the areas usually taken into consideration while defining strategies for growth. Her technique even revealed the effects of recent top level management decisions. We also used this technique in recruitment areas by figuring out which employee best fits what role depending on various facets of his personality such as communication, team-spirit, quick decision making ability to name a few. - **Anand Rao Group President Corporate HR Yash Birla Group**
